INDEXES TO VOLUME 125

INDEXES TO VOLUME 125

INDEX TO SUBJECTS

Abnormal Stars of Delta Cephei Type, On Two. *Cuno Hoffmeister* 824

Absorption Coefficients from Solar-Line Profiles, A Nomographic Method for Determining the Scattering and. *John Waddell* 747

Absorption Effects in the Spectra of Two Strong Radio Sources, 21-cm. *C. A. Muller* . 830

Absorption Lines in Distant Stars. I. Northern Milky Way, Interstellar. *Guido Münch* . 42

Absorption Lines in T Tauri-like Stars, The Widths of. *George H. Herbig* 612

Absorption and Opacity at Temperatures above 10^8 ° K, Gamma-Ray. *S. N. Milford* . 213

Active Regions, The Chromosphere near. *R. G. Athay and R. N. Thomas* 788

Activity at the Time of 200 Mc/s Noise Storms near the 1954 Solar Minimum, Résumé of Visually and Photographically Observed Solar. *Helen W. Dodson and E. Ruth Hedeman* 827

Algol, A Spectroscopic Investigation of. *Alan S. Meltzer* 359

Analysis of Counts of the Extragalactic Nebulae in Terms of a Fluctuating Density Field. III. *D. Nelson Limber* 9

Analyzing the Spectra of Zeta Aurigae Stars, Comments on Methods for. *Anne B. Underhill* 118

Asteroids. VI. Photometric Magnitudes, Photometric Studies of. *Thomas Gehrels* . . 550

Atmosphere with Near Thermodynamic Radiative Equilibrium, Hydrogen Lines in an. *William Grasberger* 750

Atmosphere Supported by Radiation. I. The Kinetic Temperature of an. *Alvin H. Davis* 771

Atmosphere of Tau Scorpii, The. *L. H. Aller, G. Elste, and J. Jugaku* 614

Atmosphere. I. The Resonance Lines, The Source Function in a Non-Equilibrium. *Richard N. Thomas* 260

Atmosphere of Varying Density, Analytic Solutions for the Blast-Wave Problem with an. *M. H. Rogers* 478

Atmospheres of the B Stars. IV. The Calculation of Partition Functions. *Günther Elste and Jun Jugaku* 742

Atmospheres, The Emission of Continuous Radiation in Stellar. *B. E. J. Pagel* . . . 298

Axially Symmetric Torsional Oscillations of a Star in the Presence of a Poloidal Magnetic Field. *C. Plumpton* 494

Axisymmetric Self-excited Fluid Dynamo, The. *George Backus* 500

Band-Width Effects in Photoelectric Photometry. *Victor M. Blanco* 209

Bands of the C_2 Molecule in the Spectrum of the R-Type Star HD 182040, A Study of the Swan. *John G. Phillips* 163

B–F, The Interpretation of Photoelectric Colors for Stars of Types. *W. K. Bonsack, J. L. Greenstein, J. S. Mathis, W. G. Melbourne, G. Neugebauer, R. L. Newburn, K. H. Olsen, W. G. Tifft, H. D. Wahlquist, and G. Wallerstein* 139

Binaries Omicron Tauri, Xi Cancri, and Mu Ursae Majoris, The Orbits of the Spectroscopic. *E. S. Jackson, W. W. Shane, and Beverly T. Lynds* 712

Binaries 52 Persei and 35 Cygni, The Orbits of the Spectroscopic. *K. Osawa* 707

Binaries Rho Orionis, Eta Bootis, and 32 Virginis, The Orbits of the Spectroscopic. *F. C. Bertiau, S.J.* 696

Blast-Wave Problem with an Atmosphere of Varying Density, Analytic Solutions for the. *M. H. Rogers* 478

Brightness of Maia (20 c Tauri), On the Spectrum and. *O. Struve, J. Sahade, C. R. Lynds, and S. S. Huang* 115

B Stars. IV. The Calculation of Partition Functions, Atmospheres of the. *Günther Elste and Jun Jugaku* 742

Ca II Emission in Classical Cepheid Variables. *Robert P. Kraft* 336

Carbon Monoxide in the Solar Atmosphere. *Gordon Newkirk, Jr.* 571

Carbon Stars in Two Northern Milky Way Zones. *J. J. Nassau and V. M. Blanco* . . 195

Carbon Stars, Vibrational Temperatures of Five. *Arne A. Wyller* 177

21-Centimeter Observations near Galactic Longitude 120°. *Robert J. Davis* 391

Cepheid Variables, Ca II Emission in Classical. *Robert P. Kraft* 336

Chemical Compositions of Selected Planetary Nebulae. *Lawrence H. Aller* 84

Chromosphere near Active Regions, The. *R. G. Athay and R. N. Thomas* 788

Cluster, The Color-Magnitude Diagram of the Pleiades. *R. I. Mitchell and H. L. Johnson* 414

Clusters. II. NGC 6530, Studies of Extremely Young. *Merle F. Walker* 636

Clusters, The Internal Structure of Globular. *Sebastian von Hoerner* 451

21-cm Absorption Effects in the Spectra of Two Strong Radio Sources. *C. A. Muller* . 830

21-cm Zeeman Splitting, On the Possibility of Measuring Interstellar Magnetic Fields by. *J. G. Bolton and J. P. Wild* 296

C_2 Molecule, Laboratory Determination of Relative Transition Probabilities of Diatomic Molecules. II. The Swan System ($^3\Pi_g - {}^3\Pi_u$) of the. *John G. Phillips* 153

C_2 Molecule in the Spectrum of the R-Type Star HD 182040, A Study of the Swan Bands of the. *John G. Phillips* 163

Coefficients from Solar-Line Profiles, A Nomographic Method for Determining the Scattering and Absorption. *John Waddell* 747

Coefficients of Viscosity and Thermal Conductivity in the Hydrogen Convection Zone, The. *Frank N. Edmonds, Jr.* 535

Color-Magnitude Diagram of the Pleiades Cluster, The. *R. I. Mitchell and H. L. Johnson* 414

Colors for Stars of Types B–F, The Interpretation of Photoelectric. *W. K. Bonsack, J. L. Greenstein, J. S. Mathis, W. G. Melbourne, G. Neugebauer, R. L. Newburn, K. H. Olsen, W. G. Tifft, H. D. Wahlquist, and G. Wallerstein* 139

Comet-Tail Structures in Emission Nebulae. *Donald E. Osterbrock* 622

Compositions of Selected Planetary Nebulae, Chemical, *Lawrence H. Aller* 84

Conductivity in the Hydrogen Convection Zone, The Coefficients of Viscosity and Thermal. *Frank N. Edmonds, Jr.* 535

Continuous Radiation in Stellar Atmospheres, The Emission of. *B. E. J. Pagel* . . . 298

Convection Zone, The Coefficients of Viscosity and Thermal Conductivity in the Hydrogen. *Frank N. Edmonds, Jr.* . . . 535

Convective Envelope and Inhomogeneous Interior, Inhomogeneous Stellar Models. V. A Solar Model with. *M. Schwarzschild, R. Howard, and R. Härm* . . . 233

Coronal Line, λ 5694, Profile of the Yellow. *Donald E. Billings* . . . 817

Crab Nebula, Polarization of the. *W. A. Hiltner* . . . 300

(20 c Tauri), On the Spectrum and Brightness of Maia. *O. Struve, J. Sahade, C. R. Lynds, and S. S. Huang* . . . 115

35 Cygni, The Orbits of the Spectroscopic Binaries 52 Persei and. *K. Osawa* . . . 707

Decay of an External Magnetic Field, Influence of Fluid Motions on the. *Lyman Spitzer, Jr.* . . . 525

Delta Cephei Type, On Two Abnormal Stars of. *Cuno Hoffmeister* . . . 824

Delta Delphini, Photoelectric Observations of. *Charles L. Perry* . . . 825

Delta Delphini, The Radial Velocity of. *O. Struve, J. Sahade, and V. Zebergs* . . . 692

Diagram of the Pleiades Cluster, The Color-Magnitude. *R. I. Mitchell and H. L. Johnson* 414

Diatomic Molecules. II. The Swan System ($^3\Pi_g - {}^3\Pi_u$) of the C_2 Molecule, Laboratory Determination of Relative Transition Probabilities of. *John G. Phillips* . . . 153

Dissociation Processes in Oxygen above 1750 A. *P. G. Wilkinson and R. S. Mulliken* . 594

Dwarfs, Population Differences among M. *A. N. Vyssotsky and E. R. Dyer, Jr.* . . . 297

Dwarfs, The Spectra of White. *Beverly T. Lynds* . . . 719

Dynamo, The Axisymmetric Self-excited Fluid. *George Backus* . . . 500

Early Main-Sequence Stars, The Evolution of. *R. S. Kushwaha* . . . 242

Early M- and S-Type Stars in Two Galactic Zones, Reddened. *V. M. Blanco and J. J. Nassau* . . . 408

Eclipse, The Spectrum of β Persei during Primary. *O. Struve and J. Sahade* . . . 689

Emission in Classical Cepheid Variables, Ca II. *Robert P. Kraft* . . . 336

Emission of Continuous Radiation in Stellar Atmospheres, The. *B. E. J. Pagel* . . . 298

Emission in Late-Type Stars, Dependence of Line Width on Luminosity and Related Topics, H and K. *O. C. Wilson and M. K. Vainu Bappu* . . . 661

Emission-Line Stars in the Vicinity of Messier 8, Messier 20, and Simeis 188. *George H. Herbig* . . . 654

Emission Nebulae, Comet-Tail Structures in. *Donald E. Osterbrock* . . . 622

Emission in NGC 5128 and NGC 1316, The Sources of Radio. *G. R. Burbidge and E. Margaret Burbidge* . . . 1

Equilibrium, Hydrogen Lines in an Atmosphere with Near Thermodynamic Radiative. *William Grasberger* . . . 750

Equilibrium of a Self-gravitating Rotating Incompressible Fluid Spheroid with a Magnetic Field, The. *John Sykes* . . . 615

Equilibrium of Triplet Levels of Neutral Helium, Statistical. *John S. Mathis* . . . 318

Eta Bootis, and 32 Virginis, The Orbits of the Spectroscopic Binaries Rho Orionis. *F. C. Bertiau, S.J.* 696

Evolution of Early Main-Sequence Stars, The. *R. S. Kushwaha* 242

Evolution. I. Luminosity Functions, Observational Approach to. *Allan Sandage* . . . 422

Evolution. II. A Computed Luminosity Function for K0–K2 Stars from $M_v = +5$ to $M_v = -4.5$, Observational Approach to. *Allan Sandage* 435

Excited Triplet State of the Negative Hydrogen Ion, Search for a Discrete. *G. R. Lowrey and R. D. Present* 611

Extragalactic Nebulae in Terms of a Fluctuating Density Field. III. Analysis of Counts of the. *D. Nelson Limber* 9

Flare-connected Prominences. *James W. Warwick* 811

Fluctuating Density Field. III. Analysis of Counts of the Extragalactic Nebulae in Terms of a. *D. Nelson Limber* 9

Fluid Dynamo, The Axisymmetric Self-excited. *George Backus* 500

Fluid Motions on the Decay of an External Magnetic Field, Influence of. *Lyman Spitzer, Jr.* 525

Fluid Spheroid with a Magnetic Field, The Equilibrium of a Self-gravitating Rotating Incompressible. *John Sykes* 615

Function of Population I, The Luminosity. *Sidney van den Bergh* 445

Galactic Longitude 120°, 21-Centimeter Observations near. *Robert J. Davis* 391

Galactic Research, Low-Dispersion Spectra in the Yellow-red Region and Their Application in. *A. G. Velghe* 728

Galactic Zones, Reddened Early M- and S-Type Stars in Two. *V. M. Blanco and J. J. Nassau* 408

Gamma-Ray Absorption and Opacity at Temperatures above 10^8 ° K. *S. N. Milford* . 213

Gaseous Nebula M8, Two Bright Knots in the. *A. G. Velghe* 822

Gaseous Nebulae, Relative [O II] Intensities in. *M. J. Seaton and D. E. Osterbrock* . . 66

Giants, A Spectroscopic Comparison between High- and Low-Velocity K. *Martin and Barbara Schwarzschild, L. Searle, and A. Meltzer* 123

Globular Clusters, The Internal Structure of. *Sebastian von Hoerner* 451

H and K Emission in Late-Type Stars: Dependence of Line Width on Luminosity and Related Topics. *O. C. Wilson and M. K. Vainu Bappu* 661

HD 182040, A Study of the Swan Bands of the C_2 Molecule in the Spectrum of the R-Type Star. *John G. Phillips* 163

Helium to Hydrogen in the Orion Nebula, The Ratio of. *John S. Mathis* 328

Helium, Statistical Equilibrium of Triplet Levels of Neutral. *John S. Mathis* 318

Hydrogen Convection Zone, The Coefficients of Viscosity and Thermal Conductivity in the. *Frank N. Edmonds, Jr.* 535

Hydrogen Ion, Search for a Discrete Excited Triplet State of the Negative. *G. R. Lowrey and R. D. Present* 611

Hydrogen Lines in an Atmosphere with Near Thermodynamic Radiative Equilibrium. *William Grasberger* . . . 750

Hydrogen in the Orion Nebula, The Ratio of Helium to. *John S. Mathis* . . . 328

Hydrogen, Oscillator Strengths and Matrix Elements for the Electric Dipole Moment for. *Louis C. Green, Patricia P. Rush, and Carolyn D. Chandler* . . . 835

Image-forming Stellar Interferometer, Increase of Telescope Resolution with Time-Selection and an. *John R. Platt* . . . 601

Inhomogeneous Stellar Models. V. A Solar Model with Convective Envelope and Inhomogeneous Interior. *M. Schwarzschild, R. Howard, and R. Härm* . . . 233

Intensities in Gaseous Nebulae, Relative [O II]. *M. J. Seaton and D. E. Osterbrock* . . . 66

Interferometer, Increase of Telescope Resolution with Time-Selection and an Image-forming Stellar. *John R. Platt* . . . 601

Internal Structure of Globular Clusters, The. *Sebastian von Hoerner* . . . 451

Interpretation of Photoelectric Colors for Stars of Types B–F, The. *W. K. Bonsack, J. L. Greenstein, J. S. Mathis, W. G. Melbourne, G. Neugebauer, R. L. Newburn, K. H. Olsen, W. G. Tifft, H. D. Wahlquist, and G. Wallerstein* . . . 139

Interstellar Absorption Lines in Distant Stars. I. Northern Milky Way. *Guido Münch* . . . 42

Interstellar Magnetic Fields by 21-cm Zeeman Splitting, On the Possibility of Measuring. *J. G. Bolton and J. P. Wild* . . . 296

Isophotometer, A High-Resolution. *O. C. Mohler and A. K. Pierce* . . . 285

Isotopes in Stars, Nuclear Reactions with the Neon. *Jerry B. Marion and William A. Fowler* . . . 221

K Emission in Late-Type Stars: Dependence of Line Width on Luminosity and Related Topics, H and. *O. C. Wilson and M. K. Vainu Bappu* . . . 661

K Giants, A Spectroscopic Comparison between High- and Low-Velocity. *Martin and Barbara Schwarzschild, L. Searle, and A. Meltzer* . . . 123

Kinetic Temperature of an Atmosphere Supported by Radiation. I. The. *Alvin H. Davis* 771

K0–K2 Stars from $M_v = +5$ to $M_v = -4.5$, Observational Approach to Evolution. II. A Computed Luminosity Function for. *Allan Sandage* . . . 435

Laboratory Determination of Relative Transition Probabilities of Diatomic Molecules. II. The Swan System ($^3\Pi_g - ^3\Pi_u$) of the C_2 Molecule. *John G. Phillips* . . . 153

16 Lacertae, The Velocity-Curve of. *D. H. McNamara* . . . 684

Late-Type Stars, Dependence of Line Width on Luminosity and Related Topics, H and K Emission in. *O. C. Wilson and M. K. Vainu Bappu* . . . 661

Levels of Neutral Helium, Statistical Equilibrium of Triplet. *John S. Mathis* . . . 318

Line, λ 5694, Profile of the Yellow Coronal. *Donald E. Billings* . . . 817

Line Profiles with an Electronic Computer, The Prediction of Model-Atmosphere. *Arnold M. Heiser* . . . 470

Line Profiles, A Nomographic Method for Determining the Scattering and Absorption Coefficients from Solar-. *John Waddell* . . . 747

Line Width on Luminosity and Related Topics, H and K Emission in Late-Type Stars, Dependence of. *O. C. Wilson and M. K. Vainu Bappu* . . . 661

Lines in an Atmosphere with Near Thermodynamic Radiative Equilibrium, Hydrogen. *William Grasberger* 750

Lines in Distant Stars. I. Northern Milky Way, Interstellar Absorption. *Guido Münch* . 42

Lines, The Source Function in a Non-Equilibrium Atmosphere. I. The Resonance. *Richard N. Thomas* 260

Lines in T Tauri-like Stars, The Widths of Absorption. *George H. Herbig* 612

Low-Dispersion Spectra in the Yellow-red Region and Their Application in Galactic Research. *A. G. Velghe* 728

Luminosity Function for K0–K2 Stars from $M_v = +5$ to $M_v = -4.5$, Observational Approach to Evolution. II. A Computed. *Allan Sandage* 435

Luminosity Function of Population I, The. *Sidney van den Bergh* 445

Luminosity Functions, Observational Approach to Evolution. I. *Allan Sandage* . . . 422

Luminosity and Related Topics, H and K Emission in Late-Type Stars, Dependence of Line Width on. *O. C. Wilson and M. K. Vainu Bappu* 661

Magnetic Field, Axially Symmetric Torsional Oscillations of a Star in the Presence of a Poloidal. *C. Plumpton* 494

Magnetic Field, The Equilibrium of a Self-gravitating Rotating Incompressible Fluid Spheroid with a. *John Sykes* 615

Magnetic Field, Influence of Fluid Motions on the Decay of an External. *Lyman Spitzer, Jr.* 525

Magnetic Fields by 21-cm Zeeman Splitting, On the Possibility of Measuring Interstellar. *J. G. Bolton and J. P. Wild* 296

Magnitudes, Photometric Studies of Asteroids. VI. Photographic. *Thomas Gehrels* . . 550

Maia (20 c Tauri), On the Spectrum and Brightness of. *O. Struve, J. Sahade, C. R. Lynds, and S. S. Huang* 115

Main-Sequence Stars, The Evolution of Early. *R. S. Kushwaha* 242

Mars, 1956, Visual Observations of. *Gerard P. Kuiper* 307

Masses of the Protoplanets, On the Origin of Pluto and the. *Eugene Rabe* 290

Matrix Elements for the Electric Dipole Moment for Hydrogen, Oscillator Strengths and. *Louis C. Green, Patricia P. Rush, and Carolyn D. Chandler* 835

M Dwarfs, Population Differences among. *A. N. Vyssotsky and E. R. Dyer, Jr.* . . . 297

Messier 8, Messier 20, and Simeis 188, Emission-Line Stars in the Vicinity of. *George H. Herbig* 654

Messier 20, and Simeis 188, Emission-Line Stars in the Vicinity of Messier 8. *George H. Herbig* 654

Milky Way, Interstellar Absorption Lines in Distant Stars. I. Northern. *Guido Münch* . 42

Milky Way Zones, Carbon Stars in Two Northern. *J. J. Nassau and V. M. Blanco* . . 195

Model-Atmosphere Line Profiles with an Electronic Computer, The Prediction of. *Arnold M. Heiser* 470

Models. V. A Solar Model with Convective Envelope and Inhomogeneous Interior, Inhomogeneous Stellar. *M. Schwarzschild, R. Howard, and R. Härm* 233

Molecules. II. The Swan System ($^3\Pi_g - {}^3\Pi_u$) of the C_2 Molecule, Laboratory Determination of Relative Transition Probabilities of Diatomic. *John G. Phillips* 153

Motions on the Decay of an External Magnetic Field, Influence of Fluid. *Lyman Spitzer, Jr.* 525

Motions of Solar Spicules, The Numbers and. *R. G. Athay and R. N. Thomas* . . . 804

Mount Wilson Spectrograms of P Cygni. *Walter S. Adams and Paul W. Merrill* . . . 102

M8, Two Bright Knots in the Gaseous Nebula. *A. G. Velghe* 822

Mu Ursae, Majoris, The Orbits of the Spectroscopic Binaries Omicron Tauri, Xi Cancri, and. *E. S. Jackson, W. W. Shane, and Beverly T. Lynds* 712

Nebula M8, Two Bright Knots in the Gaseous. *A. G. Velghe* 822

Nebula, Polarization of the Crab. *W. A. Hiltner* 300

Nebula, The Ratio of Helium to Hydrogen in the Orion. *John S. Mathis* 328

Nebulae, Chemical Compositions of Selected Planetary. *Lawrence H. Aller* 84

Nebulae, Comet-Tail Structures in Emission. *Donald E. Osterbrock* 622

Nebulae, Relative [O II] Intensities in Gaseous. *M. J. Seaton and D. E. Osterbrock* . . 66

Nebulae in Terms of a Fluctuating Density Field. III. Analysis of Counts of the Extragalactic. *D. Nelson Limber* 9

Negative Hydrogen Ion, Search for a Discrete Excited Triplet State of the. *G. R. Lowrey and R. D. Present* 611

Neon Isotopes in Stars, Nuclear Reactions with the. *Jerry B. Marion and William A. Fowler* 221

NGC 5128 and NGC 1316, The Sources of Radio Emission in. *G. R. Burbidge and E. Margaret Burbidge* 1

NGC 1316, The Sources of Radio Emission in NGC 5128 and. *G. R. Burbidge and E. Margaret Burbidge* 1

NGC 6530, Studies of Extremely Young Clusters. II. *Merle F. Walker* 636

Noise Storms near the 1954 Solar Minimum, Résumé of Visually and Photographically Observed Solar Activity at the Time of 200 Mc/s. *Helen W. Dodson and E. Ruth Hedeman* 827

Nomographic Method for Determining the Scattering and Absorption Coefficients from Solar-Line Profiles, A. *John Waddell* 747

Nuclear Reactions with the Neon Isotopes in Stars. *Jerry B. Marion and William A. Fowler* 221

Observational Approach to Evolution. II. A Computed Luminosity Function for K0–K2 Stars from $M_v = +5$ to $M_v = -4.5$. *Allan Sandage* 435

Observational Approach to Evolution. I. Luminosity Functions. *Allan Sandage* . . . 422

Observations of Delta Delphini, Photoelectric. *Charles L. Perry* 825

Observations of Mars, 1956, Visual. *Gerard P. Kuiper* 307

Observations near Galactic Longitude 120°, 21-Centimeter. *Robert J. Davis* 391

Observations of Solar-Line Profiles, Photoelectric. *John B. Rogerson, Jr.* 275

Observations of SW Lacertae, Photoelectric. *Robert R. Brownlee* 372

Omicron Tauri, Xi Cancri, and Mu Ursae Majoris, The Orbits of the Spectroscopic Binaries. *E. S. Jackson, W. W. Shane, and Beverly T. Lynds* 712

Opacity at Temperatures above 10^8 ° K, Gamma-Ray Absorption and. *S. N. Milford* . 213

Orbits of the Spectroscopic Binaries Omicron Tauri, Xi Cancri, and Mu Ursae Majoris, The. *E. S. Jackson, W. W. Shane, and Beverly T. Lynds* 712

Orbits of the Spectroscopic Binaries 52 Persei and 35 Cygni, The. *K. Osawa* 707

Orbits of the Spectroscopic Binaries Rho Orionis, Eta Bootis, and 32 Virginis, The. *F. C. Bertiau, S.J.* 696

Origin of Pluto, Further Studies on the. *Gerard P. Kuiper* 287

Origin of Pluto and the Masses of the Protoplanets, On the. *Eugene Rabe* 290

Orion Nebula, The Ratio of Helium to Hydrogen in the. *John S. Mathis* 328

Oscillations of a Star in the Presence of a Poloidal Magnetic Field, Axially Symmetric Torsional. *C. Plumpton* 494

Oscillator Strengths and Matrix Elements for the Electric Dipole Moment for Hydrogen. *Louis C. Green, Patricia P. Rush, and Carolyn D. Chandler* 835

Oxygen above 1750 A, Dissociation Processes in. *P. G. Wilkinson and R. S. Mulliken* . 594

Partition Functions, Atmospheres of the B Stars. IV. The Calculation of. *Günther Elste and Jun Jugaku* 742

P Cygni, Mount Wilson Spectrograms of. *Walter S. Adams and Paul W. Merrill* . . 102

52 Persei and 35 Cygni, The Orbits of the Spectroscopic Binaries. *K. Osawa* 707

β Persei during Primary Eclipse, The Spectrum of. *O. Struve and J. Sahade* 689

Photoelectric Colors for Stars of Types B–F, The Interpretation of. *W. K. Bonsack, J. L. Greenstein, J. S. Mathis, W. G. Melbourne, G. Neugebauer, R. L. Newburn, K. H. Olsen, W. G. Tifft, H. D. Wahlquist, and G. Wallerstein* 139

Photoelectric Observations of Delta Delphini. *Charles L. Perry* 825

Photoelectric Observations of Solar-Line Profiles. *John B. Rogerson, Jr.* 275

Photoelectric Observations of SW Lacertae. *Robert R. Brownlee* 372

Photoelectric Photometry, Band-Width Effects in. *Victor M. Blanco* 209

Photographically Observed Solar Activity at the Time of 200 Mc/s Noise Storms near the 1954 Solar Minimum, Résumé of Visually and. *Helen W. Dodson and E. Ruth Hedeman* 827

Photometric Studies of Asteroids. VI. Photographic Magnitudes. *Thomas Gehrels* . . 550

Photometry, Band-Width Effects in Photoelectric. *Victor M. Blanco* 209

Planetary Nebulae, Chemical Compositions of Selected. *Lawrence H. Aller* 84

Pleiades Cluster, The Color-Magnitude Diagram of the. *R. I. Mitchell and H. L. Johnson* 414

Pluto, Further Studies on the Origin of. *Gerard P. Kuiper* 287

Pluto and the Masses of the Protoplanets, On the Origin of. *Eugene Rabe* 290

Polarization of the Crab Nebula. *W. A. Hiltner* 300

Population Differences among M Dwarfs. *A. N. Vyssotsky and E. R. Dyer, Jr.* . . . 297

Population I, The Luminosity Function of. *Sidney van den Bergh* 445

Profile of the Yellow Coronal Line, λ 5694. *Donald E. Billings* 817

Profiles with an Electronic Computer, The Prediction of Model-Atmosphere Line. *Arnold M. Heiser* 470

Profiles, A Nomographic Method for Determining the Scattering and Absorption Coefficients from Solar-Line. *John Waddell* 747

Profiles, Photoelectric Observations of Solar-Line. *John B. Rogerson, Jr.* 275

Prominences, Flare-connected. *James W. Warwick* 811

Protoplanets, On the Origin of Pluto and the Masses of the. *Eugene Rabe* 290

Radial Velocity of Delta Delphini, The. *O. Struve, J. Sahade, and V. Zebergs* 692

Radiation. I. The Kinetic Temperature of an Atmosphere Supported by. *Alvin H. Davis* 771

Radiation in Stellar Atmospheres, The Emission of Continuous. *B. E. J. Pagel* . . . 298

Radiative Equilibrium, Hydrogen Lines in an Atmosphere with Near Thermodynamic. *William Grasberger* 750

Radio Emission in NGC 5128 and NGC 1316, The Sources of. *G. R. Burbidge and E. Margaret Burbidge* 1

Radio Sources, 21-cm Absorption Effects in the Spectra of Two Strong. *C. A. Muller* . . 830

Ratio of Helium to Hydrogen in the Orion Nebula, The. *John S. Mathis* 328

Reactions with the Neon Isotopes in Stars, Nuclear. *Jerry B. Marion and William A. Fowler* 221

Reddened Early M- and S-Type Stars in Two Galactic Zones. *V. M. Blanco and J. J. Nassau* 408

Resolution with Time-Selection and an Image-forming Stellar Interferometer, Increase of Telescope. *John R. Platt* 601

Resonance Lines, The Source Function in a Non-Equilibrium Atmosphere. I. The. *Richard N. Thomas* 260

Rho Orionis, Eta Bootis, and 32 Virginis, The Orbits of the Spectroscopic Binaries. *F. C. Bertiau, S.J.* 696

Rotating Incompressible Fluid Spheroid with a Magnetic Field, The Equilibrium of a Self-gravitating. *John Sykes* 615

R-Type Star HD 182040, A Study of the Swan Bands of the C_2 Molecule in the Spectrum of the. *John G. Phillips* 163

Scattering and Absorption Coefficients from Solar-Line Profiles, A Nomographic Method for Determining the. *John Waddell* 747

Self-excited Fluid Dynamo, The Axisymmetric. *George Backus* 500

Simeis 188, Emission-Line Stars in the Vicinity of Messier 8, Messier 20, and. *George H. Herbig* 654

Solar Activity at the Time of 200 Mc/s Noise Storms near the 1954 Solar Minimum, Résumé of Visually and Photographically Observed. *Helen W. Dodson and E. Ruth Hedeman* 827

Solar Atmosphere, Carbon Monoxide in the. *Gordon Newkirk, Jr.* 571

Solar-Line Profiles, A Nomographic Method for Determining the Scattering and Absorption Coefficients from. *John Waddell* 747

Solar-Line Profiles, Photoelectric Observations of. *John B. Rogerson, Jr.* 275

Solar Minimum, Résumé of Visually and Photographically Observed Solar Activity at the Time of 200 Mc/s Noise Storms near the 1954. *Helen W. Dodson and E. Ruth Hedeman* 827

Solar Model with Convective Envelope and Inhomogeneous Interior, Inhomogeneous Stellar Models. V. A. *M. Schwarzschild, R. Howard, and R. Härm* 233

Solar Spicules, The Numbers and Motions of. *R. G. Athay and R. N. Thomas* . . . 804

Source Function in a Non-Equilibrium Atmosphere. I. The Resonance Lines, The. *Richard N. Thomas* 260

Charged Particles in a Force-free Magnetic Field, Motion of. *Donat G. Wentzel* . . . 559

Chemical Composition of the Ba II Star HD 46407 and Its Bearing on Element Synthesis in Stars. *E. Margaret Burbidge and G. R. Burbidge* 357

Chemical Composition, Frequencies of Stars with Various. *Sebastian v. Hoerner* . . . 592

Chromosphere, Hα Profiles in the. *Elske v. P. Smith* 529

Circulation in Shell-Source Stars, Meridional. *L. Mestel* 550

Cloud, The Gross Dynamics of a Hydromagnetic Gas. *Eugene N. Parker* 229

Clouds of Jupiter, The Equatorial. *P. Squires* 185

Cluster, the Moon, and the Andromeda Nebula at a Wave Length of 75 Cm, Observations of Discrete Sources, the Coma. *Charles L. Seeger, Gart Westerhout, and Robert G. Conway* 585

Clusters, Photometric Distances of Galactic. *Harold L. Johnson* 121

Clusters, A Search for Cepheids in Galactic. *Sidney van den Bergh* 323

Color Index of the Sun, Six-Color Photometry of Stars. X. The Stellar Magnitude and. *Joel Stebbins and Gerald E. Kron* 266

Color-Magnitude Diagram for I Orionis, The. *Harold L. Johnson* 134

Colors of O-, B-, and A-Type Stars, Photoelectric Spectrophotometry. II. Monochromatic. *Walter K. Bonsack and Jurgen Stock* 99

Coma Cluster, the Moon, and the Andromeda Nebula at a Wave Length of 75 Cm, Observations of Discrete Sources, the. *Charles L. Seeger, Gart Westerhout, and Robert G. Conway* 585

Composition of the Ba II Star HD 46407 and Its Bearing on Element Synthesis in Stars, Chemical. *E Margaret Burbidge and G. R. Burbidge* 357

Composition, Frequencies of Stars with Various Chemical. *Sebastian v. Hoerner* . . . 592

Convection, Anisotropy of Solar. *Wasaburo Unno* 259

Convective Envelopes, On the Pulsational Stability of Stars with. *Irving N. Rabinowitz* 386

Corona, A New Instrument for Observing the Electron. *Gérard Wlérick and James Axtell* 253

Coronal Streaming in Solar Sunspot Prominences. *L. Marshall* 177

Crab Nebula, Acceleration in the Expansion of the. *F. M. Johnson and C. H. Townes* 466

Crab Nebula, Evidence for Polarized Radio Radiation from the. *C. H. Mayer, T. P. McCullough, and R. M. Sloanaker* 468

32 Cygni, Spectroscopic Results on. *Peter Wellmann* 30

Determination of Spectroscopic Absolute Magnitudes for Late-Type Stars, The. *J. B. Oke* 509

Deuterium, Theories of Element Synthesis and the Abundance of. *Leon Heller* . . . 341

Diagram for I Orionis, The Color-Magnitude. *Harold L. Johnson* 134

Diffuse Reflection from Planetary Atmospheres. *D. L. Harris* 408

Discrete Sources, the Coma Cluster, the Moon, and the Andromeda Nebula at a Wave Length of 75 Cm, Observations of. *Charles L. Seeger, Gart Westerhout, and Robert G. Conway* 585

Dispersion of Auroral Protons, On a Possible Velocity. *Joseph W. Chamberlain* . . . 245

Distances of Galactic Clusters, Photometric. *Harold L. Johnson* 121

Distribution of Visible Stars, On the. *Alladi Ramakrishnan and R. Vasudevan* . . . 573

Dust by the Sun, Gas-Dust Interaction in the Accretion of Interstellar. *Charles B. Stephenson* 195

Dynamics of a Hydromagnetic Gas Cloud, The Gross. *Eugene N. Parker* 229

Eclipse, Physical Conditions in the Solar Limb Prominence Observed at the 1952. *R. G. Athay and Frank Q. Orrall* 167

Eclipse, Variation of He I Lines in the Algol System during Primary. *Su-Shu Huang* . 51

Eclipsing Binaries, Photoelectric Observations of. *Daniel M. Popper* 598

Eclipsing Binaries. III. Z Vulpeculae, Rediscussion of. *Daniel M. Popper* 53

Eclipsing Binary UX Monocerotis, The. *C. R. Lynds* 69

Electron Corona, A New Instrument for Observing the. *Gérard Wlérick and James Axtell* 253

Electron Interactions in White Dwarf Stars. *R. P. Singh* 213

Electronic Band System in Molecular Nitrogen, An Electric Quadrupole. *P. G. Wilkinson and R. S. Mulliken* 10

Element Synthesis and the Abundance of Deuterium, Theories of. *Leon Heller* . . . 341

Element Synthesis in Stars, Chemical Composition of the Ba II Star HD 46407 and Its Bearing on. *E. Margaret Burbidge and G. R. Burbidge* 357

Emission in Late-Type Stars, Hϵ. *O. C. Wilson* 46

Emission Lines, Limitations on Physical Theories of H and K. *O. C. Wilson* 525

Emission Lines in Stellar Spectra, Turbulent Velocities Inferred from the H and K. *Leo Goldberg* 318

Emission in O Stars, On the Origin of the λ 5696. *Anne B. Underhill* 28

Enhancement of Certain Helium Lines in the Limb Flare of June 24, 1956, On the. *Harold Zirin* 159

Equatorial Clouds of Jupiter, The. *P. Squires* 185

Equilibrium of an Oblate Liquid Spheroid with a Magnetic Field, On the. *Guro Gjellestad* 565

Errata 601

Evidence for Polarized Radio Radiation from the Crab Nebula. *C. H. Mayer, T. P. McCullough, and R. M. Sloanaker* 468

Evidence for Vegetation on Mars, Spectroscopic. *William M. Sinton* 231

Evolution. III. Semiempirical Evolution Tracks for M67 and M3, Observational Approach to. *Allan Sandage* 326

Evolution Tracks for M67 and M3, Observational Approach to Evolution. III. Semiempirical. *Allan Sandage* 326

Expansion of the Crab Nebula, Acceleration in the. *F. M. Johnson and C. H. Townes* 466

Flare of June 24, 1956, On the Enhancement of Certain Helium Lines in the Limb. *Harold Zirin* 159

Fluctuations by Radiative Transfer, The Smoothing of Temperature. *Edward A. Spiegel* 202

Fluid of Finite Conductivity II, Hydromagnetic Disturbances in a. *P. H. Roberts* . . 418

Force-free Magnetic Field, Motion of Charged Particles in a. *Donat G. Wentzel* . . . 559

Force-free Magnetic Fields, On. *S. Chandrasekhar and P. C. Kendall* 457

Force-free Magnetic Fields, On the Stability of. *S. K. Trehan* 429

Frequencies of Stars with Various Chemical Composition. *Sebastian v. Hoerner* . . . 592

Galactic-Cluster Members, A List of Classical Cepheids Which May Be. *Robert P. Kraft* 225

Galactic Clusters, Photometric Distances of. *Harold L. Johnson* 121

Galactic Clusters, A Search for Cepheids in. *Sidney van den Bergh* 323

Galactic Nebulosities. II. A Description of Certain. *Helmut A. Abt, W. W. Morgan, and Bengt Strömgren* 322

Gas Cloud, The Gross Dynamics of a Hydromagnetic. *Eugene N. Parker* 229

Gas-Dust Interaction in the Accretion of Interstellar Dust by the Sun. *Charles B. Stephenson* 195

Giants, Line Broadening in High-Luminosity Stars. I. Bright. *Helmut A. Abt* . . . 503

H and K Emission Lines, Limitations on Physical Theories of. *O. C. Wilson* 525

H and K Emission Lines in Stellar Spectra, Turbulent Velocities Inferred from the. *Leo Goldberg* 318

Hα-Emission Stars and Planetary Nebulae in the Vicinity of M8 and M20 and in Vela from $l = 230°$ to $241°$ along the Galactic Equator. *A. G. Velghe* 302

Hα Profiles in the Chromosphere. *Elske v. P. Smith* 529

Hϵ Emission in Late-Type Stars. *O. C. Wilson* 46

HD 46407 and Its Bearing on Element Synthesis in Stars, Chemical Composition of the Ba II Star. *E. Margaret Burbidge and G. R. Burbidge* 357

He I Lines in the Algol System during Primary Eclipse, Variation of. *Su-Shu Huang* 51

Helium and Hydrogen Abundances in Planetary Nebulae, The Ratio of. *John S. Mathis* 493

Helium Lines in the Limb Flare of June 24, 1956, On the Enhancement of Certain. *Harold Zirin* 159

High-Dispersion Spectra of Mars. *C. C. Kiess, C. H. Corliss, Harriet K. Kiess, and Edith L. R. Corliss* 579

High-Luminosity Stars. I. Bright Giants, Line Broadening in. *Helmut A. Abt* . . . 503

Holtsmark's Theory of Line Broadening, Shielding Correction to. *H. Hoffman and O. Theimer* . . . 595

Hydrogen Abundances in Planetary Nebulae, The Ratio of Helium and. *John S. Mathis* 493

Hydrogen in M32, M51, and M81, Neutral. *David S. Heeschen* . . . 471

Hydromagnetic Disturbances in a Fluid of Finite Conductivity. II. *P. H. Roberts* . . 418

Hydromagnetic Gas Cloud, The Gross Dynamics of a. *Eugene N. Parker* . . . 229

Hydromagnetics, Bessel and Related Functions Which Occur in. *Donna D. Elbert* . . 598

Identification of Solar "M" Regions with Unipolar Magnetic Regions. *H. W. Babcock* 224

Inhomogeneous Stellar Models. VI. An Improved Solar Model with the Carbon Cycle Included. *Ray Weymann* . . . 208

Instrument for Observing the Electron Corona, A New. *Gérard Wlérick and James Axtell* 253

Interstellar Dust by the Sun, Gas-Dust Interaction in the Accretion of. *Charles B. Stephenson* . . . 195
